IT SUPPORT | WEB & SOFTWARE DEVELOPER | CYBER SECURITY

PROFILE

4th- year Bachelor of Science in Information Technology student with experience in web and software development through academic group projects, including serving as a Lead Developer. Interested in IT support and cybersecurity, with a willingness to learn, solve technical problems, and gain experience in a professional environment.

PROJECT EXPERIENCE

Lead Developer – SmartBarangay

Integrated Barangay Management and Service Information System

- Led the development of a web-based system for managing barangay records and services.
- Worked with the team on system features, database integration, and troubleshooting.
- Developed features such as resident records, document requests, inventory, and service management.
- Used Next.js, Firebase, Tailwind CSS, and Git/GitHub.

Lead Developer – ExamGuard

- Led the development of a mobile-based examination system as part of a group project.
- Worked on application features, database integration, testing, and troubleshooting.
- Used Flutter and Firebase while coordinating development tasks with team members.

Lead Developer – Library Management System

- Led the development of a library management system for an academic project.
- Worked on PHP functionality, database operations, and user features.
- Helped with testing, troubleshooting, and improving the system during development.

Lead Developer – Quest Planner

- Led the development of a web-based quest and task management system.
- Worked on features such as user accounts, quests, inventory, notifications, and timers.
- Worked with PHP and database-related functions as part of the development team.
